Contents

Influence of surface finish on low-cycle fatigue characteristics of Type 316 stainless steel at 400°C. J. Wareing and H. G. Vaughan 1

Some observations on dendritic morphology and dendrite arm spacings. M. A. Taha 9

Effects of impurities and pores on fire-cracking of lead-containing α-nickel silvers. H.-W. Schläpfer and W. Form 13

Influence of grain boundary structure on discontinuous precipitation in austenitic steel. M. H. Ainsley, G. J. Cocks, and D. R. Miller 20

Microstructural assessment of fractional life approach to low-cycle fatigue at high temperatures. M. F. Day and G. B. Thomas 25

Effect of thermomechanical treatment on structure and properties of 2036 aluminium alloy. M. C. Chaturvedi, D. W. Chung, and R. A. Doucette 34

Predominantly elastic crack growth under combined creep-fatigue cycling. G. J. Lloyd 39

Creep deformation of low-alloy Cr–Mo–V steel under constant and cycling temperature conditions. B. Walser 49

Influence of intergranular precipitates on diffusional growth of creep voids. I. G. Crossland and J. E. Harris 55

Omega phase precipitation in ternary $(Ti_xZr_{1-x})_{70}Nb_{30}$ type alloys. W. B. Jones, R. Taggart, and D. H. Polonis. 60

Ordering and recrystallization in Fe–50Co–0·4%Cr. R. A. Buckley 67

Occurrence of shear bands in heavily rolled cubic metals. I. L. Dillamore, J. G. Roberts, and A. C. Bush 73

Fatigue-crack growth rate in overheated ESR steel. R. C. Andrew, G. M. Weston, and J. C. Ritter . . 78

Nucleation of recrystallization at second-phase particles in deformed copper alloys. J. R. Porter and F. J. Humphreys. 83

Correlation between rupture ductility and cavitation in Cr–Mo–V steels. N. Shin-Ya and S. R. Keown . 89

Diffusion with chemical reaction. G. Roberts 94

Papers presented at conference on 'Recrystallization in the development of microstructure' held at the University of Leeds on 4–6 April 1978

Development in annealing and structure and mobility of grain boundaries in pure metals. D. A. Smith and C. M. F. Rae 101

Annealing twin formation by boundary dissociation. P. J. Goodhew 108

Nucleation of recrystallization—model for strain-induced grain boundary migration. A. H. King and D. A. Smith 113

Grain boundary mobility in solid solution alloys. M. Hillert 118

Influence of phosphorus additions on annealing behaviour of cold-worked copper. W. B. Hutchinson and R. K. Ray 125

Examination of recrystallization and grain growth of austenite with the photoemission electron microscope. G. Sheard and J. Nutting. 131

Recrystallization mechanisms in two-phase alloys. F. J. Humphreys 136

Grain boundary diffusion in migrating boundaries. K. Smidoda, C. Gottschalk, and H. Gleiter 146

Nucleation of recrystallization in aluminium containing dispersions of alumina. A. R. Jones, B. Ralph, and N. Hansen 149

Recrystallization behaviour of commercial Al–1%Mn alloy. P. Furrer and G. Hausch 155

Grain coarsening of PM nickel-base superalloy by critical strain annealing. M. Dahlén and L. Winberg . 163

Structural and textural aspects of deformation and recrystallization of low-carbon steels containing dispersions of Nb(CN). A. P. Davidson and D. R. F. West. 170

Recrystallization of microduplex steels. B. A. Cooke, A. R. Jones, and B. Ralph 179

Recrystallization and grain growth in hot rolling. C. M. Sellars and J. A. Whiteman 187

Dynamic recrystallization kinetics. W. Roberts, H. Bodén, and B. Ahlblom 195

Recrystallization in hot rolling of dilute aluminium alloys. J. C. Blade 206

Hot deformation behaviour of particle-stabilized structures in Zr-bearing Al alloys. E. Nes 211

Recrystallization during hot deformation of aluminium alloys. K. J. Gardner and R. Grimes. 216

Dynamic recrystallization in tension-deformed copper single crystals. G. Gottstein, D. Zabardjadi, and H. Mecking 223

Effect of rolling deformation on niobium carbide particle size distribution in low-carbon steel. J. Irvine and T. N. Baker 228

Effect of precipitation on recrystallization in microalloyed steels. J. J. Jonas and I. Weiss. 238

Contents

Recrystallization of austenitic stainless steels after hot rolling. D. J. Towle and T. Gladman 246

Static recrystallization and restoration after hot deformation of Type 304 stainless steel. D. R. Barraclough and C. M. Sellars 257

Microstructural effects of splat cooling a high-speed steel. I. R. Sare and R. W. K. Honeycombe . . . 269

Behaviour of quenched-in defects in magnesium alloys and its effect on flow stress. D. Hardie and J. M. Hampshire. 280

Interrelationship between creep deformation and creep rupture in $2\frac{1}{4}$Cr–1Mo steel. B. J. Cane 287

Friction stress measurements during creep of Nimonic 105. H. Burt, J. P. Dennison, and B. Wilshire . 295

Boron inhibition of oxidation on Fe–10%Cr studied by Auger electron spectroscopy. C. Lea 301

Additive remedy for temper brittleness. M. P. Seah, P. J. Spencer, and E. D. Hondros 307

Influence of nitrogen on oxidation resistance of low-alloy steels. D. J. Coates and A. Hendry 315

Short communication: **Structure and magnetic properties of Fe–Cr–Co–Mo alloy melted in open induction furnace.** S. Szymura and L. Sojka 320

Short communication: **Effect of cerium addition on hydrogen-absorbing capacity of ε-FeTi.** C. M. Stander 322

Tempered martensite embrittlement: Role of retained austenite and cementite. H. K. D. H. Bhadeshia and D. V. Edmonds 325

Porosity in cast and directionally solidified Al and Al–Cu alloys. F. Weinberg and D. A. Hirschfeld . . 335

Effect of microstructure on cleavage fracture toughness of quenched and tempered steels. D. A. Curry and J. F. Knott 341

Validity of friction stress σ_0 measurements for high-temperature creep. W. J. Evans and G. F. Harrison 346

Abnormal grain growth in Nimonic PE16. R. M. Boothby 351

Microstructure and interfacial tensions in Zn–In and Zn–Bi alloys. A. Passerone, R. Sangiorgi, N. Eustathopoulos, and P. Desre 359

Cleavage of ferrite strengthened by interphase precipitation of vanadium carbide. J. P. Benson 366

Effect of yttrium on oxidation behaviour of γ–γ'–Cr_3C_2 eutectic during thermal cycling to 1373 and 1493 K. E. Bullock, C. Lea, and M. McLean 373

Papers presented at conference on 'Corrosion Fatigue' held at the University of Newcastle upon Tyne on 17–19 April 1978

Some electrochemical aspects of the mechanisms of corrosion fatigue. R. N. Parkins 381

Role of mechanics in corrosion fatigue. B. Tomkins 387

Corrosion fatigue in pressure vessel steels for light water reactors. P. M. Scott 396

Corrosion fatigue of offshore structures. T. G. Gooch and G. S. Booth. 402

Influence of environment on threshold in fatigue crack growth. J. C. Radon 411

Corrosion fatigue of high-strength steel in low-pressure hydrogen gas. I. M. Austen and P. McIntyre . . 420

Effect of aqueous and hydrogen environments on fatigue crack growth in 2Ni–Cr–Mo–V rotor steel. P. Smith and A. T. Stewart 429

Crack growth in HY80 and HY130 steels by corrosion fatigue. J. Congleton, I. H. Craig, B. K. Denton, and R. N. Parkins 436

Effect of stress waveform and hold-time on environmentally assisted fatigue crack propagation in C–Mn structural steel. J. D. Atkinson and T. C. Lindley. 444

Effect of isothermal tempering on acoustic emission during ductile fracture of low-alloy steel. H. N. G. Wadley, D. C. Furze, C. B. Scruby, and B. L. Eyre 451

Microstructure of cold-rolled copper. A. S. Malin and M. Hatherly 463

Development of recovered dislocation substructures during plastic flow. T. Sheppard, M. G. Tutcher, and H. M. Flower. 473

Influence of nitrogen on 475°C embrittlement of high-chromium ferritic steels. A. Hendry, Z. F. Mazur, and K. H. Jack 482

Embrittlement of zinc by liquid metals. C. F. Old and P. Trevena 487

Temper embrittlement in 12%Cr martensitic steel. Ph. Lemblé, A. Pineau, J. L. Castagne, Ph. Dumoulin, and M. Guttmann 496

Short communication: **Damping capacity of metastable γ-phase in manganese-rich Mn–Fe alloys.** K. Ito, M. Kobayashi, and H. Abe 502

Discussion: **Accuracy of tracer diffusion measurements in Fe–Cr system using tracer analysis.** A. M. Huntz and M. Aucouturier 504

Contents

Structure of lath martensite and occurrence of retained austenite in as-quenched Fe–V–C low-alloy steels. N. C. Law, P. R. Howell, and D. V. Edmonds 507

Structure and properties of plastically deformed α-Ti. M. Blicharski, S. Nourbakhsh, and J. Nutting . . 516

Influence of ageing stress on yield point phenomenon in very low carbon steel. M. Duval and J. I. Dickson 523

Surface segregation of nickel and antimony in iron. J. Q. Clayton and G. T. Burstein 530

Influence of grain size and yield strength on threshold fatigue behaviour of low-alloy steel. J. P. Benson . 535

Nucleation entropy and grain refinement of alloys. W. V. Youdelis 540

Material-related model for thermal fatigue applied to tool steels in hot-work applications. S. Malm and L.Å. Norström 544

Short communication: **Redetermination of internal stress during creep of Al–5·5 at.-%Mg alloy at high temperatures.** H. Oikawa and A. Yasuda 551

Discussion: **Effect of hydrogen charging on nodularizing efficiency of rare earth alloy used in treating cast iron.** Y. Serita 554

Critical assessment: **Creep crack growth in low-alloy steels.** R. Pilkington 555

Fractography and X-ray photoelectron spectroscopy of free-machining steels. E. D. Doyle, R. L. Aghan, F. P. Larkins, and M. E. Hughes 565

Grain size and high-temperature yield strength of polycrystalline copper. R. A. Petkovic, M. J. Luton, and J. J. Jonas 569

Structure–property relationships in quenched and tempered carbon steels. K. Onel and J. Nutting . . . 573

Size effect of martensitic steels during rotating beam fatigue tests. L. Vincent, B. Coquillet, and P. Guiraldenq 580

Tempering of high-purity and commercially based steels containing 10 wt-% tungsten or 5 wt-% molybdenum. R. J. Tunney and N. Ridley 585

Liquid metal embrittlement of aluminium single crystals by gallium. C. F. Old and P. Trevena 591

Short communication: **Secondary ion analysis of segregation in welded steels.** P. Sotkovszki, S. Larsson, and K. E. Easterling 597

Reduced ductility of high-strength aluminium alloy during or after exposure to water. D. Hardie, N. J. H. Holroyd, and R. N. Parkins 603

Effect of solution temperature and rolling schedule on niobium steel controlled-rolled into ferrite temperature range. T. N. Baker and N. A. McPherson 611

Superplastic behaviour in nominally single-phase and two-phase Al–Cu alloys. K. Matsuki, K. Minami, M. Tokizawa, and Y. Murakami 619

Sigma phase formation in conventional and PM nickel-base superalloys. C. C. Law, W. Wallace, C. P. Ashdown, and D. A. Grey 627

Superplasticity in aluminium–silicon eutectic. D. W. Chung and J. R. Cahoon 635

Friction stress σ_0 and relationship between initial and secondary creep rates in precipitation-hardened nickel-base alloy. W. J. Evans and G. F. Harrison 641

Coarsening of dispersed particles in solid matrixes. S. W. Thomas, M. R. James, and J. R. Moon 651

Computer simulations of coarsening of particle dispersions. S. W. Thomas, P. A. Brook, and J. R. Moon 655

Estimation of Norton–Bailey parameters from creep rupture data. L. Bråthe and L. Josefson 660

Nucleation of recrystallized grains in heavily cold-worked α-brass. J. Huber and M. Hatherly 665

Phase equilibria in the Ni–Ta–Al system. P. Nash and D. R. F. West 670

Influence of nickel on toughness and ductile–brittle transition in low-carbon martensite steels. L.-Å. Norström and O. Vingsbo 677

Thermal analysis for interpretation of solidification cycle. H. Fredriksson and B. Rogberg 685

Serrated flow in austenitic state of 300 grade marageing steel. I. S. Kim and M. C. Chaturvedi 691

High-temperature lattice parameters of copper–aluminium alloys. S. K. Seshadri and D. B. Downie . . 696

Book notices 48, 449

Use of units in *Metal Science* 97

Corrigenda 306, 650

***Acta Metallurgica* Gold Medal Award** 506
